EDUCATION

University of Massachusetts Amherst

BS in Computer Science (GPA: 3.83)

Graduation Date: May 2026

- Relevant Coursework: Computer Systems & Networks, Data Management, Discrete Math, Algorithms
- Awards: Dean's Honors List, Chancellor's Award

WORK EXPERIENCE

Amazon

New York, NY

Software Development Engineer Intern

May 2025 - August 2025

- Designed and developed an internal portal system, reducing network configuration lookup time by **70%** for cloud operations team
- Architected secure backend authentication using **AWS Cognito**, **API Gateway**, and internal services, improving access control validation by **40%**
- Achieved **99.9%** availability and reduced API response times by **60%** through serverless architecture using **AWS Lambda** and **API Gateway**
- Implemented comprehensive monitoring solution using **CloudWatch** and **X-Ray**, increasing incident detection speed by **45%**

UMass Amherst IT

Amherst, MA

Software Engineering Intern

December 2023 - April 2025

- Launched **6+** pages with custom routing for agile form submission, improving ease of use for **200** employees
- Enabled pinning of important messages by refactoring the public dispatch logs site, adopted by **50+** users, reducing message lookup time **30%**
- Designed RSpec test suite, boosting test accuracy and reducing time-to-market
- Optimized database queries and storage through custom controller actions for transportation data
- Implemented duplicate-trip feature for similar routes, saving analysts **7+** minutes daily

Expedia Group

San Jose, CA

Technology Extern

July 2024 - August 2024

- Conducted in-depth analysis of pricing strategies of **10** major players in the digital advertising space
- Utilized advanced analytics tools and methodologies, improving research accuracy and efficiency by **30%**

Captionex

Philadelphia, PA

Web Development Intern

May 2023 - August 2023

- Built a responsive dashboard using React.js, reducing load time by **40%** and improving engagement by **25%**
- Integrated automated testing using Jest, increasing code coverage from **60%** to **85%**

PROJECTS

Rideshare Web Application (<https://github.com/aarinmehta/RideshareUMass>)

- Engineered a rideshare app for the Five College community (UMass Amherst) that connects students and faculty as riders or drivers, enabling them to post, search, and coordinate rides through a verified **.edu** account system
- Built with React.js, Node.js, and PostgreSQL featuring JWT authentication, role-based dashboards, interactive map integration, and an automated ride-matching engine; facilitated **150+** rides and cut average coordination time **40%** in a **50**-user pilot

WorldWide News (<https://github.com/aarinmehta/worldwide-news>)

- Built a full-stack web app that lets users explore top news articles from any country via an interactive globe, with relevancy filters that adjust results by topic and scoring
- Developed with a Python/FastAPI backend, PostgreSQL database, and React frontend, sourcing live data from the GDELT 2.0 API with both unit-tested backend logic and a documented manual test suite

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL (PostgreSQL), Ruby, HTML, CSS
- **Tools/Frameworks:** React, Node.js, FastAPI, Git, GitHub, RSpec, Jest, Jira, Agile Methodologies
- **AWS/Cloud:** Lambda, Cognito, API Gateway, CloudWatch, X-Ray, DynamoDB
